Vacancy:
LCA/materials specialist and Sustainability
Consultant

Salary:
Negotiable, depending on experience

Job start date:
Immediate

Location:
London SE1

Eight Associates is a friendly sustainability consultancy providing expertise and solutions to building owners and design and construction professionals that add intrinsic and commercial value to the built environment.

Established in 2008, our team have unparalleled experience providing consultation and advice on building performance analysis, sustainable business strategy, ecology appraisal and enhancement, and environmental assessment.

Our broad range of clients includes owners, designers, developers and managers of estate portfolios, high-end residential property, logistic operation centres, commercial fit-outs, social housing, educational institutions and healthcare facilities.

We are a growing team and are seeking a determined and intelligent individual, with a strong belief in the role of the built environment in achieving a sustainable future, to join our friendly and energetic team.

We are looking for a sustainability consultant who can demonstrate a detailed knowledge of Life Cycle Assessment (LCA), and the environmental impact of materials, preferably in a built environment context.

Key responsibilities (essential):

Responsibilities will include, but may not be limited to, the following:

- Conducting Life Cycle Assessments and the quantification of the environmental impact of buildings;
- Life Cycle Costing;
- Appraisal of building fabric and materials and wider sustainability objectives such as energy, air quality and pollution;
- Client consulting; determining expectations and achieving deliverables.

Candidate profile:

The successful applicant will have the following:

- Background in an architectural/engineering/science related discipline;
- An MSc or related post-graduate degree with strong academic track record;
- Comprehensive knowledge of the quantification of environmental impacts, EPDs and a sophisticated understanding of environmental science;
- A minimum of 3 years' experience of LCA;
- A demonstrable knowledge of material science i.e. how materials are made and the corresponding environmental implications would be viewed highly favourably.

Personal attributes:

Further to the above, we are looking to meet candidates with the following qualities:

- A firm commitment to environmental considerations and climate change mitigation;
- Happy to work within a team and with clients;
- Able to communicate effectively both verbally and in writing;
- A swift problem-solver with imagination and initiative;
- Positive and independently-minded with a good sense of humour.

Expressions of interest:

Please send your CV in PDF format, quoting your availability and salary expectations to:
info@eightassociates.co.uk with "Oct 2019 LCA position" in the subject line.
